	<b>Title</b>	<b>Abstract</b>
1	Method and apparatus for accelerating data access operations in a database system	
2	Systems and methods for transforming data in buffer memory without unnecessarily copying data to additional memory locations	
3	Method for multiple configurations of wireless network connection settings	
4	High speed non-concurrency controlled database	
5	Transactional memory manager	
6	System and method for modular data search with database text extenders	
7	System and method of merging static data in web pages	
8	Automated profiler system for providing medical information to patients
